Assignment 1: Class discussion and analysis of Russell and Norvig's chapter on Philosophy, Ethics, and Safety of AI

Description

In week 6, students will study Russell and Norvig's chapter on Philosophy, Ethics, and Safety of AI. They are expected to read the chapter at home and come to class prepared with a summary. Additionally, they will analyze AI Ethics Principles/guidelines based on the Montreal Declaration for a Responsible Development of Artificial Intelligence and UNESCO's Recommendations on the Ethics of Artificial Intelligence.

In-class activity

- Each pair of students will be assigned one principle from the Montreal Declaration (https:/montrealdeclaration-responsibleai.com/the-declaration/) and a related principle from UNESCO(https://www.unesco.org/en/artificial-intelligence/recommendation-ethics).
- They will compare their summaries of the book chapter, compare the two principles, and relate them back to the chapter.
- Also, give any examples of the two assigned principles in the three films previously studied.
- Must upload their notes/findings for a grade.

Assigned Readings

- Russell and Norvig's chapter on Philosophy, Ethics, and Safety of AI
